OBJECTIVE

PhD researcher in hardware security, focused on side-channel analysis, fault injection, hardware Trojan detection, and IP protection. Experienced in digital VLSI and ASIC design flows, including RTL design, verification, synthesis, and ML-assisted security analysis.

EDUCATION

Doctor of Philosophy(Ph.D.) in Electrical Engineering, The University of Kansas Expected 2026
Advisor: Dr. Tamzidul Hoque, Assistant Professor, EECS, KU.

Master's of Science (M.S.) in Electrical Engineering, The University of Kansas May 2025
Advisor: Dr. Tamzidul Hoque, Assistant Professor, EECS, KU.

Bachelor of Science in Electrical and Electronic Engineering
Ahsanullah University of Science and Technology, Bangladesh, CGPA: 3.69 2016 - 2021

TECHNICAL SKILLS & STRENGTHS

Hardware Description Language: Verilog, VHDL.
FPGA Design Tools: Xilinx Vivado, ISE, SDK; Quartus.
Programming Languages: Python, C, MATLAB, Assembly (MIPS).
Design & Verification Tools: Cadence Virtuoso, Genus, Encounter; ModelSim; PSpice, HSPICE.
Simulation and Analysis Tools: gem5, Intel VTune, McPAT.
Hardware Platforms: **FPGA Boards:** HaHa Board (Intel MAX10), Altera DE2-115 FPGA, Basys 3 Artix-7, Nexys A7-100T. **Embedded Systems:** Raspberry Pi, Arduino, STM32.
Compilers and Toolchains: LLVM.
Side-Channel Analysis: Keysight Spyder, Inspector, Pinata, high-precision EM probe; ChipWhisperer Husky; PicoScope; Tektronix DPO70404C Oscilloscope; Analog Discovery 2.
Scripting: Tcl (Tickle), Bash, Git.

WORK EXPERIENCE

Intern - Machine Learning Security (Applied ML & Fault Injection) May 18, 2026 - Aug 7, 2026 (Expected)
Keysight Technologies, Santa Rosa, CA
Model-guided optimization and adaptive learning workflows are to be developed for fault-injection parameter tuning. Responsibilities include experiment design, telemetry instrumentation, scalable hyperparameter search, reliability metrics, and a prototype demo for improving detection coverage over baseline flows.

Graduate Teaching Assistant Aug 2024 - Dec 2024
Department of Electrical Engineering and Computer Science, The University of Kansas
Conducted lab sessions and graded assignments for undergraduate courses in digital logic and computer architecture, assisting in developing course materials and exams. Provided guidance in project-based learning using MARS MIPS and gem5 x86 simulators, enhancing student engagement and understanding.

Graduate Research Assistant Jan 2022 - Aug 2024; Jan 2025 - Present
Department of Electrical Engineering and Computer Science, The University of Kansas
Conducted research on hardware security, focusing on detecting and mitigating hardware Trojans in microelectronic ICs. Developed a novel Trojan detection and data protection method using side-channel analysis, leading to publications in top-tier conferences and journals.

Reserach Mentor Summer 2025
NSF Research Experience for Undergraduates (REU) Project
Mentored four undergraduate research assistants as part of the NSF-funded REU program, in collaboration with the University of Kansas and Wright State University.

Summer Camp Instructor Summer 2023, 2024
Department of Electrical Engineering and Computer Science, The University of Kansas
Organized and conducted summer camps teaching high school students computer hardware fundamentals through gamified,

hands-on projects using FPGAs and basic electronics. Fostered an engaging learning environment to teach electronics and programming concepts.

Co-Instructor

Fall 2023

The University of Kansas

Co-taught the course “Hands-On Introduction to Computer Hardware using FPGA and Microcontroller,” where I developed modules using FPGAs, simulations, and the ESP32 embedded Aha Board to teach hardware fundamentals of computer systems.

RESEARCH EXPERIENCE AND PROJECTS

- **Trojan-Assisted Meta-Attacks Against Design-for-Security Primitives:** Developed a unified framework to evaluate how hardware Trojans can systematically identify and neutralize Design-for-Security (DfS) primitives in zero-trust microelectronics supply chains. Demonstrated attacks on Ring Oscillator Physically Unclonable Functions (RO-PUFs) and Dynamically Obfuscated Scan Chains (DOSC), enabling authentication bypass, scan-protection removal, and motivating Trojan-aware countermeasures.
- **Runtime Protection of Secrets in Untrusted COTS Processors:** Developed HOACS, a software-based framework that uses Residue Number Coding (RNC) to keep sensitive data encoded during execution on commercial off-the-shelf (COTS) processors. Implemented both C-library and LLVM-based transformations to protect cryptographic and arithmetic workloads from hardware-Trojan leakage and side-channel attacks without requiring hardware modification.
- **Side-Channel-Driven Security Evaluation of Opaque COTS Hardware:** Proposed a gray-box evaluation framework for assessing unknown COTS devices before deployment when internal design information is unavailable. The approach leverages power and electromagnetic (EM) side-channel measurements to identify anomalous behaviors, guide vulnerability discovery, and support pre-deployment assurance under zero-trust hardware assumptions.
- **Gamified Learning Framework for Computer Hardware Fundamentals:** Developed hardware-based games to teach fundamental concepts of computer hardware using Verilog, FPGA, and ESP32 development boards. *Funded by NSF, 2022 to present.*

GRANTS

Here is the list of Grants I have worked on as a Research Assistant.

MARCH 2022 - PRESENT	Collaborative Research: Gamified Learning of Computing Hardware Fundamentals Funding Agency: National Science Foundation, Award Number: 2142696
OCTOBER 2024 - PRESENT	Collaborative Research: Engaging High Schoolers in Integrated Computer Science and Engineering Through Hands-On Experiences with Microelectronics and Artificial Intelligence Funding Agency: National Science Foundation, Award Number: 2405375
2024 - PRESENT	Collaborative Research: SaTC: CORE: Medium: KIPPER: A Scalable Learning-Guided Hardware IP Protection Platform Funding Agency: National Science Foundation, Award Number: 2350364

SIGNIFICANT COURSES

MAJOR COURSES IN B.SC.:	VLSI - I, VLSI - II, Analog Integrated Circuit, Processing and Fabrication Technology, Computer Architecture, Compound Semiconductor and Hetero-Junction Devices.
MAJOR COURSES IN PH.D. :	Intro. Hardware Security, Advance Software Security, Modern Computer Architecture, Machine Learning, Embedded Machine Learning, Advance Data Science, Computer Vision.

RESEARCH TALKS & PRESENTATIONS

JANUARY 2025	Leakage Unplugged: A Hands-On Tutorial on Power Side-Channel Attacks Research Workshop in the I2S Student Research Symposium 2025
FEBRUARY 2024	Power Side-Channel and Fault Attacks on ASCON and their Countermeasures Information Advantage Scholars Visit at I2S, KU

HONORS & AWARDS

MAY 2026	National Science Foundation (NSF) Travel Grant IEEE International Symposium on Hardware Oriented Security and Trust (HOST 2026 Symposium)
JANUARY 2024	First Place (Poster Presentation) In the I2S Student Research Symposium
MAY 2023	Champion: Microelectronics Security Challenge (IP security) IEEE International Symposium on Hardware Oriented Security and Trust (HOST 2023 Symposium)
MAY 2023	National Science Foundation (NSF) Travel Grant IEEE International Symposium on Hardware Oriented Security and Trust (HOST 2023 Symposium)
APRIL 2023	David D. and Mildred H. ROBB Award Awarded by the EECS department of the University of Kansas
APRIL 2023	People's Choice Award (Poster Presentation) Among 16 participants in the 2023 Research Showcase by the Graduate Engineering Association of KU
APRIL 2023	Third Place (Poster Presentation) Among 16 participants in the 2023 Research Showcase by the Graduate Engineering Association of KU
MARCH 2023	Second Place (Research Showcasing) Among 20 participants in the I2S Student Research Symposium
DECEMBER 2022	Bangladesh Sweden Trust Fund (A travel grant for Graduate study in USA)
JUNE 2022	National Science Foundation (NSF) Travel Grant IEEE International Symposium on Hardware Oriented Security and Trust (HOST 2022 Symposium)
MARCH 2021	Best AUST Paper Award The 23rd International Conference on Computer and Information Technology (ICCIT 2020)
FALL 2019	Tuition Waiver Award (Based on the result of the top 8% students)
AUGUST 2018	Runner-up Hardware Exhibition, Inter University Software and Hardware Carnival-2018, University of Asia Pacific
APRIL 2018	Second Runner-up Project Showcasing of Technival '18, Khulna University of Engineering and Technology (KUET)
FEBRUARY 2018	Second Runner-up Hardware of Engenius '18, Organized by AUST EEE Society
FEBRUARY 2018	Champion Hardware Showcasing of Technomania '18, AUST CSE Society

PROFESSIONAL SERVICE: PEER REVIEW

JOURNAL REVIEWER	SN Computer Science Physica Scripta Journal of Physics: Condensed Matter IEEE Embedded Systems Letters Journal of Hardware and Systems Security
CONFERENCE REVIEWER	Technical Program Committee (TPC): IEEE Computer Society Annual Symposium on VLSI (ISVLSI 2026) 2026 ASEE Annual Conference & Exposition 2024 ASEE Annual Conference & Exposition
PROFESSIONAL RESPONSIBILITIES	Judge: I2S Undergrad Students Research Showcase
